# CLIENT EXPERIENCE

## THANK YOU FOR STOPPING BY!

We invite you to join us on our journey as we reveal the Client Experience Solutions by BNP Paribas Wealth Management.

Our ambition is to define the best use of technology to bring our clients to the next level of experience which they have helped us to define. Each of these new solutions is improving a part of our client journey, be it starting their relationship with us, seizing investment opportunities or ensuring the highest level of security.

Our clients are already experiencing the changes and there are even more to come.

WE HOPE YOU'LL ENJOY THE EXPERIENCE!

# EQUIPPING OUR PRIVATE BANKERS WITH DIGITAL TOOLS

Innovation in our Design Factories in Asia, Luxembourg and Switzerland goes beyond improving the client experience. We've developed digital tools for our Private Bankers to take this approach one step further by leveraging mobile tablets as sales tools and digitised applications.

From ideation to prototyping, these tools are co-created with our Private Bankers and product specialists, and are designed around their day-to-day activities within the bank and in interactions with clients and prospects. These tools are already in use by our Private Bankers, and as long as there are new ideas, we will meet those challenges to help our Private Bankers be better equipped for the future.

## Pitch Book

The Pitch Book is a digital presentation tool for Private Bankers to use in meetings with prospective clients. Designed to be interactive and customisable, it enables the Private Bankers to select and highlight information that may be of specific interest to the prospect they are meeting.

## Discretionary Portfolio Management

The Discretionary Portfolio Management tool allows Private Bankers to recommend a tailored DPM solution based on client's preferences. It takes into consideration the client's investment objectives, risk appetite, currency, amount of capital, asset class, geographic preference for equity allocation, and willingness to invest in alternative investments.

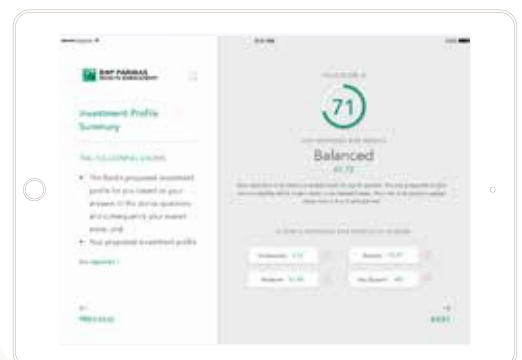

## Advisory

The Advisory tool gives our Private Bankers the ability to assess a client's suitability for myAdvisory, a personalised advisory service which offers active asset allocation, investment recommendations, regular portfolio reviews, performance analysis, and risk monitoring. With this tool, clients are able to create a sample customised portfolio by incorporating their personal investment preferences which can be compared with our model portfolio.

## Investment Profile Questionnaire

The Investment Profile Questionnaire tool is designed for Private Bankers to help our clients determine their knowledge of financial instruments and their investment profile. The information is used to assess our clients' investment suitability on various products offered by the bank. With the IPQ tool on the tablet, digital signatures are accepted and will eliminate the need for paper use.

# WHO'S EATING PIZZA?

Thanks to agile pizza teams,  
more than 250 motivated and creative staff members are bringing ideas,  
looking at new opportunities and helping to make a difference  
to the Wealth Management client experience.

## FACTORY POSITIONS

### THE PRODUCT OWNER

Has the vision of the target product and is in charge of the product conception.

### THE TECH LEAD

Brings technical expertise to the team to ensure the feasibility of the product.

### THE DESIGNERS (UI/UX)

Are responsible for defining the user experience, how the product feels.

### THE SWISS-KNIFE

Will seek the answers to any questions that the team faces.

### THE SCRUM MASTER

Facilitates the communication within the team. Seeks to improve the productivity and the know-how of the team.

### THE DEVELOPER

Gets everything in shape, front-end to back-end, architecture of the app and the development of the different features.

### THE GROWTH HACKER

Ensures product growth using creative communication and marketing techniques to turn visitors into happy clients.

# They share their experience

## **ROBYN LEE** Growth Hacker

This opportunity has given me a chance at entrepreneurship. The pizza team concept of working allows me to adapt and shift our focus in response to changing needs of the project as it progresses. We test at each stage of development and not just with the clients playing to the strengths and talents of each individual from diverse backgrounds in order to deliver the final product to the client.

## **SEBASTIEN NICOLET** Swiss-knife

Being part of the factory as a Swiss Knife was a privilege of working with extremely bright and motivated people in a different way: focus on client!  
It was a pleasure to maintain the link between the pizza team and the rest of the bank for projects with a short timeframe.

## **LUCAS TISSERANT** Product Owner

You can imagine a product owner as a co-founder of a start-up. You defend the value proposition of your product, define the strategic view and orientation of the project and present it to clients for feedback and sponsors for validation. You are here to change the bank and mindset of people you work with by focusing on what really matters:  
Client Experience

## **JOEY TAN** Tech Lead

Being part of the Pizza team is a new and exciting experience. Productivity and collaboration level increase tremendously as everyone becomes more integrated within the team; with each of us playing a specific role but collaborating in a more seamless way. Everyone from developer to product owner can interact daily and be fully transparent to deliver a common goal objective.
